EDUCATION

Dublin City University | *BSc Computing For Business* *Citywest* | **09/2023 - Present**

- **Grade**: Second Class Honours - 2.1
- **Relevant Coursework**: App Development, Software Engineering, Enterprise Architecture, Machine Learning & Search Technologies

University Of Bordeaux | *Erasmus Exchange Semester* *Bordeaux, France* | **09/2025 - 01/2026**

- Completed an Erasmus semester in the Science & Technology faculty, studying core CS modules including Data Structures & Algorithms, Object-Oriented Programming, and Software Engineering, alongside Mathematics and Game Development.
- Developed independence and cross-cultural adaptability by living and studying abroad, balancing academic workload with full integration into a new country and language environment.

EXPERIENCE

Global Mobile Tele-Communications Coordinator Intern | *SAP Technologies* *Citywest* | **01/2026 - 08/2026**

- Facilitated **80,000+** mobile connections across **60+** global carriers, resolving day-to-day connectivity issues for employees and improving response turnaround for the mobile support team.
- Converted **50+** pieces of static, written internal mobile IT support content into clearer, more engaging formats by building websites and a small library of AI-generated video guides, making self-service troubleshooting easier and reducing basic support queries reaching the team by **38%**.
- Tested mobile provisioning and connectivity workflows, flagging recurring issues that fed into process improvements for the wider mobile support function.

Risk Technology Intern | *Allied Irish Banks (AIB)* *Dublin* | **06/2025 - 08/2025**

- Analysed risk datasets using **SQL**, **Excel**, and **Power BI** to support regular reporting aligned with **BCBS 239** and **IFRS 9** regulatory requirements.
- Reviewed large datasets to catch inconsistencies and inaccuracies, helping improve the reliability of data feeding into risk reports.
- Collaborated with **2+** cross-functional technology and risk teams within an Agile environment, contributing to sprint deliverables and weekly risk trend updates.

UNIVERSITY/PERSONAL PROJECTS

Django Blog Application

- Developed a **full-stack** blog platform from scratch using **Django**, structuring models, views, and templates to support user-created posts.
- Implemented core **CRUD** functionality, allowing users to create, edit, and publish content through a clean, functional interface.
- Set up routing and templating to organize the site into distinct pages (post feed, individual post view, post creation), improving usability over a single-page layout.

SQL Database for Leap Card Users

- Designed a **relational database** schema for **100+** simulated Leap Card user records, structuring tables to reflect realistic transit-usage data.
- Applied **normalization** principles to reduce data redundancy and keep the schema easy to query and maintain.
- Wrote **SQL** queries to retrieve and filter user data, demonstrating practical database querying beyond basic table setup.

Travel Destinations Website

- Built a multi-page front-end using **HTML**, **CSS**, and **JavaScript**, presenting destination information across an organised, navigable site structure.
- Developed **backend** logic to handle and store user input, connecting **front-end** interactions to underlying data.

- Styled the site for a consistent, readable layout across pages, focusing on clear presentation of destination content.

VOLUNTEERING & LEADERSHIP

Future Leader | Circl Online
- Completed the Circl Future Leaders Programme, gaining a leadership qualification and coaching skills alongside managers from global companies.

Youth Mentor | Citywise
- Mentor at Citywise, supporting local teens through homework clubs and confidence-building workshops.

Volunteer Facilitator | Foroige Tallaght
- Facilitated events promoting positive mental health and inclusion in secondary schools with Foroige Tallaght.

Fundraising Co-organiser | Temple Street
- Co-organised a school-wide fundraiser for Temple Street, raising €1,200+.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, HTML, CSS, C

Frameworks: Django

Databases: MySQL, PostgreSQL

Tools: Excel, Power BI

Other: Linux, BASH, Windows
